PROFESSIONAL SUMMARY

Passionate Web Developer and Cyber Security Trainee with hands-on experience in Full Stack Web Development and MERN Stack technologies. Strong problem-solving, communication, and teamwork skills with experience in customer service and sales. Certified in CCNA, AI Fundamentals, and modern web technologies with a strong interest in cybersecurity, networking, and innovation.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), C, C++, Java (Basic)

Frontend Technologies: HTML5, CSS3, Bootstrap 5, React.js, Responsive Web Design

Backend Technologies: Node.js, Express.js, RESTful API Development

Database: MongoDB, MySQL (Basic)

Networking & Protocols: TCP/IP, OSI Model, IPv4 & IPv6 Addressing, Subnetting, VLANs, Inter-VLAN Routing, Static Routing, DNS, DHCP, NAT, HTTP/HTTPS, FTP, SSH, ICMP, Ethernet, Routing & Switching

Simulation & Tools: Cisco Packet Tracer, Wireshark, Nmap, PuTTY, Netstat, Ping, Traceroute, ipconfig, nslookup, arp, route.

Security & Ethical Hacking: Kali Linux, Nmap, Wireshark, Network Scanning, Vulnerability Assessment, Basic Penetration Testing, OWASP Top 10, Firewall Fundamentals, Access Control, Linux Security Basics.

Cloud & Systems: Windows 10/11, Windows Server (Basics), Linux (Ubuntu & Kali Linux), Bash Commands, VirtualBox, VMware Workstation (Basics).

AI Tools & Platforms: ChatGPT, GitHub Copilot, Google Gemini — list only what you actually use.

PROJECTS

Project 1 | SmartServe Solutions — Web-Based Online Service Management System

Tech Stack : React.js, PHP, MySQL, Bootstrap, XAMPP

Environment : Multi-user web application with Admin Panel, User Panel, Service Request Module, Payment Management, MySQL Database, Local XAMPP Server

Deliverable : Source Code, Database Schema, System Documentation (BRS, SRS, URS), Project Report

Designed and developed a full-stack web application that enables users to request, track, and manage online services while providing administrators with complete control over service management and user records.

- ▶ Designed and developed secure login, registration, service booking, request tracking, and admin dashboard modules using React.js, PHP, and MySQL.
- ▶ Implemented database connectivity with CRUD operations, reducing manual record management and enabling efficient service tracking for multiple users.
- ▶ **AI Integration:** Used ChatGPT to generate optimized PHP queries, troubleshoot React components, improve UI design, and accelerate debugging, reducing overall development time by approximately 35%.

Project 2 | *LearnFlux — AI-Powered Learning Management System (LMS)*

Tech Stack : *React.js (Vite + TypeScript), Tailwind CSS, Node.js, Express.js, MongoDB, Socket.IO, JWT Authentication, Recharts*

Environment : *Multi-role web application with Student, Instructor, and Admin panels, AI-assisted learning recommendations, Practice Arena, real-time notifications, analytics dashboard, and MongoDB database.*

Deliverable : *Responsive Web Application, Source Code, Database Schema, Project Documentation (SRS, BRS), UI/UX Design*

Designed and developed an AI-powered Learning Management System (LMS) that enables students to learn through structured courses, adaptive learning paths, and an interactive Practice Arena while providing instructors and administrators with tools to manage content, users, and analytics.

- ▶ *Developed a full-stack MERN application featuring secure authentication, role-based access (Student, Instructor, Admin), course management, quiz modules, progress tracking, and an interactive dashboard.*
- ▶ *Built the **Practice Arena**, allowing users to attempt free random quizzes without purchasing a course. Added Daily Quiz Challenge, timed quizzes, instant scoring, performance analytics, and leaderboard functionality to improve user engagement.*
- ▶ **AI Integration:** *Used **ChatGPT** to generate optimized React and Express code, design MongoDB schemas, improve API architecture, troubleshoot authentication and routing issues, and enhance UI/UX workflows. AI-assisted development reduced coding and debugging time by approximately **40%** while improving code quality and development efficiency.*

Project 3 | *Eco-Trace — Electronic Waste Recycling Network*

Tech Stack : *MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT Authentication, REST API, Bootstrap/Tailwind CSS*

Environment : *Multi-panel web application with Consumer, Collection Agent, Recycling Center, Refurbished Store Manager, Environmental Auditor, and Master Admin modules, integrated with MongoDB for secure data storage and lifecycle tracking.*

Designed and developed a full-stack Electronic Waste Recycling Management System that streamlines the collection, tracking, refurbishment, recycling, and auditing of electronic waste through a centralized multi-user platform, promoting sustainable waste management and environmental responsibility.

- ▶ *Developed six role-based user panels—**Consumer, Collection Agent, Recycling Center, Refurbished Store Manager, Environmental Auditor, and Master Admin**—with secure authentication and role-based access control.*
- ▶ *Designed and implemented product lifecycle tracking, e-waste collection requests, credit ledger management, refurbishment records, recycling reports, and environmental audit modules using MongoDB and RESTful APIs, enabling end-to-end transparency of electronic waste processing.*
- ▶ **AI Integration:** *Used **ChatGPT** to assist in designing the MongoDB database schema, generating REST API structures, optimizing React components, debugging backend logic, and improving role-based workflows. AI-assisted development reduced development and testing time by approximately **35–40%** while improving code quality and documentation.*

EDUCATION

Certification — Pathway to Master in IT Infrastructure

TOPS Technologies

2026 – Present • Key modules — Routing & Switching, VLANs, OSPF/BGP, Firewall Fundamentals, Wireshark, Cisco Packet Tracer, Ethical Hacking, AWS Networking, Linux Administration, AI-assisted network troubleshooting

Degree — BCA

Veer Narmad South Gujarat University

Year of Passing — 2026 • CGPA — 8.27

EXPERIENCE

Industrial Trainee – MERN Stack Developer | LaMinds, Surat

January 2025 – June 2025 • 6 Months

Developed and maintained full-stack web applications using the MERN Stack while collaborating with senior developers on real-world projects.

- Developed responsive web applications using **React.js, Node.js, Express.js, and MongoDB**.
- Designed and integrated **RESTful APIs** for seamless communication between frontend and backend services.
- Built reusable UI components and optimized application performance to improve user experience and application responsiveness.
- Implemented **CRUD operations**, user authentication, authorization, and MongoDB database management.
- Participated in application debugging, testing, code reviews, and deployment activities throughout the development lifecycle.
- Utilized **Git, GitHub, Postman, Visual Studio Code, and npm** for version control, API testing, and collaborative development.
- Worked in an **Agile development environment**, collaborating with developers to deliver scalable and maintainable web applications.

Sales Associate | Vijay Sales, Surat

June 2024 – June 2025 • 12 Months

Provided excellent customer service while assisting customers with consumer electronics and consistently contributing to sales targets.

- Assisted customers in selecting products based on their requirements, budget, and technical needs.
- Delivered exceptional customer service, improving customer satisfaction and encouraging repeat business.
- Achieved monthly sales goals through effective communication, product demonstrations, and consultative selling.
- Explained product features, technical specifications, warranty coverage, and after-sales services.
- Resolved customer inquiries, handled billing support, and ensured smooth issue resolution with professionalism.

CERTIFICATIONS

- ▶ *Cisco Certified Network Associate (CCNA)* — Cisco Networking Academy (2026)
- ▶ *Google AI Essentials* — Google (2026)
- ▶ *Full Stack Web Development Internship Certificate* — La Minds (2025)
- ▶ *Yuva AI For All* — NASSCOM Future Skills Prime (2025)

LANGUAGES

- *English – Moderate Proficiency*
- *Hindi – Fluent*
- *Gujarati – Fluent*
